WORK EXPERIENCE

- Research Intern**
NERDS Group @ IT University of Copenhagen
• Analyzed large-scale networks to identify echo chambers and their dynamics
• Conducted social network analysis using Laplacians and spectral methods
• Applied a novel operator to study node feature propagation across directed networks (the first use in this context)
Sep 2025 — Dec 2025
Copenhagen, DK
- Co-Founder**
Polyneta
• Conducted market research and managed communications with users, clients, and partners
• Built prototypes rapidly to collect user feedback
Apr 2025 — Dec 2025
Remote
- Front-End Engineer**
Pane&Design s.r.l. (humanvsmachine)
• Developed and optimized high-traffic websites
• Integrated microservices into a large React codebase, reducing re-renders by 90%
Oct 2021 — Dec 2022
Milan, IT
- Full Stack Engineer**
Online Impresa s.r.l.
• Designed and built progressive web applications and mobile solutions for SMEs
• Automated deployment pipeline, reducing publishing time from 45 to 10 minutes
Jul 2020 — Sep 2021
Bari, IT

EDUCATION

- Università degli Studi di Milano**
Bachelor's of Science, Computer Science
• Ranked in the top 25% of students faculty-wide
• Relevant Coursework: Data Structures, Algebra, Calculus, Physics, Programming
Sep 2022 — Apr 2026
Milan, IT
- Université Paris-Saclay**
Erasmus+ Exchange
• Mastered all courses in French (a new language for me), ranking in the top 15% for half
• Relevant Coursework: Linear Programming, Machine Learning, Natural Language Processing, Bioinformatics
Sep 2023 — June 2024
Paris, FR

EXTRACURRICULAR ACTIVITIES

- Open Source Contributor**
• Various contributions to different open source projects, from bug fixes to new features ([Pixelfed](#), [Ghost](#), [nixpkgs](#))
- Silicon Valley Study Tour**
• Visited leading technology companies and research institutions in Silicon Valley hosted by industry experts; gained insights into enterprise AI and decision-making systems at scale
Aug 2025
- Won University Startup Challenge**
• Won a hackathon among all Milan universities, competing against 400 participants. Awarded with startup incubation
May 2025

PROJECTS

- Personal Homelab** (github.com/demic-dev/nixos-config)
• Leveraged NixOS and Nix to streamline homelab management, cutting deployment and maintenance time through reproducible configuration-as-code setups to selfhost my own cloud services
2025 - ongoing
- ALS Biomarker Identification** (github.com/demic-dev/als-biomarker-identification-project)
• Developed a computational pipeline to analyze RNA-seq data from ALS patients
• Implemented statistical methods to identify differentially expressed genes that could serve as potential biomarkers
May 2024

SKILLS

- Languages & Tools:** Python, SQL, Typescript, Go, Rust, Bash scripting, Nix, Git, Docker, Linux, GraphQL, React, Node.js
- Spoken Languages:** Italian (native), English (Cambridge C1 Advanced), Spanish (B1), French (B1)
