EDUCATION

Università degli Studi di Milano <i>Bachelor's of Science, Computer Science</i> - Ranked in the top 25% of students faculty-wide - Relevant Coursework: Data Structures, Algebra, Calculus, Physics, Programming	Sep 2022 — Apr 2026 <i>Milan, IT</i>
Université Paris-Saclay <i>Erasmus+ Exchange</i> - Relevant Coursework: Linear Programming, Machine Learning, Natural Language Processing, Bioinformatics - Mastered all courses in French (a new language for me), ranking in the top 15% for half - Developed cross-cultural collaboration skills in multinational academic teams	Sep 2023 — June 2024 <i>Paris, FR</i>

WORK EXPERIENCE

Research Intern NERDS Group @ IT University of Copenhagen - Analyzed large-scale networks to identify echo chambers and their dynamics - Conducted social network analysis using Laplacians and spectral methods - Applied a novel operator to study node feature propagation across directed networks (the first use in this context)	Sep 2025 — Dec 2025 <i>Copenhagen, DK</i>
Co-Founder Polyneta - Conducted market research and managed communications with users, clients, and partners - Built prototypes rapidly to collect user feedback	Apr 2025 — Dec 2025 <i>Remote</i>
Front-End Engineer Pane&Design s.r.l. - Developed and optimized high-traffic websites - Integrated microservices into a large React codebase, reducing re-renders by 90%	Oct 2021 — Dec 2022 <i>Milan, IT</i>
Full Stack Engineer Online Impresa s.r.l. - Designed and built progressive web applications and mobile solutions for SMEs - Automated deployment pipeline, reducing publishing time from 45 to 10 minutes	Jul 2020 — Sep 2021 <i>Bari, IT</i>

EXTRACURRICULAR ACTIVITIES

Silicon Valley Study Tour Visited top tech companies and universities in Silicon Valley, hosted by industry experts	Aug 2025
Won University Startup Challenge - Won a hackathon among all universities in Milan, competing against 400 participants - Awarded incubation of Polyneta at Fondazione UNIMI	May 2025
Open Source Contributor Contributed with bug fixes to PixelFed, an open-source federated social media platform Contributed with translations to Ghost, an open-source blogging platform Contributed to nixpkgs with new packages and documentation	present

PROJECTS

ALS Biomarker Identification (github.com/demic-dev/als-biomarker-identification-project) - Developed a computational pipeline to analyze RNA-seq data from ALS patients - Implemented statistical methods to identify differentially expressed genes that could serve as potential biomarkers	May 2024
--	----------

SKILLS

- Technologies:** Git, Docker, Linux
- Programming Languages:** Typescript, Python, Nix, Go, Rust, SQL, Bash scripting
- Spoken Languages:** **Italian** (native), **English** (Cambridge C1 Advanced), **French** (B1), **Spanish** (B1)
